(Correspondence of the Boston Atlas.) San Francisco, (Cal.) } January 31st, 1851.

Unusual Drought-Improvement of the City-Uncertainty of Land Titles-C tuses of Complaint-Candidates for U. S. Senator-Selection of a State Capital.

DEAR COL :- Busness of all kinds continues commercial world, is scarce, in consequence of the drought. The oldest inhabitants never even heard of such a winter, so little rain, fear that the effect will be that the crops of the next season will run very short; that would create more distress than the present want of This city is fast altering its character, and is daily becoming more and more like the old cities of the east. I refer more particularly to the habits and manners of the population, as governed and regulated by public opinion.— The greatest of all questions, the one that involves the prosperity of this city most, is the title to land. No man knows whether he owns a piece of land or not, notwithstanding he may have paid for it. He lives in daily fear that some person stronger than himself may "squat" on it, or drive him from it by force. We have not far distant, hope that we shall have a United States Court Empire State, one of these days, whence the question may be started on 'ts way to the Supreme Court at Washington. Merchants and shipmasters are diction. It seems hard to a Californian, who is charged four cents for his letter, that he should be obliged to wait two days after the mail arrives, before he can even get the privi-lege of asking at the post office if he has a let ter, and harder still to receive for answer that the steamer left some eight or ten page of letters on the Isthmus. Surely it would be nothing more than even justice to Uncle Sam to send force enough with his bags to put them through But I w li stop complaining, for if the general government do neglect us, we are abundantly able to take care of ourselves, and the gentle-men in office at Washington may find that inattention to the new State, changes four electoral votes. The slavery question will have very little effect here; the first of all questions will be, by which party will our rigit be earliest recognized, and our interests best promot, ed. The Governor of this Commonwealth re-

does not appear to be missed by the politicians

of either party. The canvass has not begun

much good in revising some of the hasty legis

The Legislature now in session are doing

for his successor.

lation of the last year, but they have not yet passed any important laws. Buth brancheand the "third house" are busy in manufacturing a Senator, and all appear to be afraid to come to the scratch. The friends of the rival candidates are full of hope, and opinions vary as much as a fancy stock on the Exchange. I senting the two great parties. Beta gentlemen are at S in Jose, with their friends, and both feel confident of success. The election pend on the selection of one of two sand banks 25 cents. that the election of a U. S. Senator is to defor the capital of a great State You are aware that Gen. Vallejo offered to give to the State itel of the State. The question of accepting mirable. and other persons, for other places were sulmitted to the citizens, for their opinion, and by
a large vote they decided in tayor of Vallejo.

Spea stock, require the settlement of this question who have done it. before they will undertake to consider officially the minor question of who shall represent the Senate of the United States. As far as I can TAIN, " with picture to match." learn, I think that the Collector's chance is the Whether his friends think better of the proposed capital than the friends of Fremont. or whether it is his peculir fitness for the po-24. I know not, but I think that he stands the young lady, with a highly poetice-nervous tem E. G. A. best chance at present.

The Lake-Opening of Navigation. The fresh South wind and warm weather of

the past few days, have suddenly, and some two weeks earlier than usual, destroyed the ice in our Lake and it is now open for Navigation. We understand the SARANAC, in fine business order and in charge of her excellent and popular Commander, Captain John O'GRADY, leaves her winter quarters today, and will commence running between Burlington and Rouse's Point edge and thought, which legitimately belongs to the We believe, notwithstanding the early open-

ing of navigation, and the immensely increased business that is expected to be done on and throug the Lake, this Season, our businessmer have not been "caught napping" in their preparations. They are ready to bogin, and we shall be greatly disappointed if the experience of the season of 1851 do not relate an imposing story of the importance of Lake Champlain in the great chain of water-communication between the Markets of the Atlantic and the Producers of the West.

The regular Line Passenger B ats will doubtless be at their posts very soon.

In this connection, we give the following from the Montreal Gazette of Thursday the 27th inst :-

OFENING OF THE NAVIGATION -We lear from Mr. Daley that arrangements have been made to run a steamer from St. John's t Rouse's Point, on and after Monday, the 31ir stant; and that the cars will run daily from Laprairie to connect with the steamer after that date. Mr. Daley will therefore be prepared after the 31st to convey passengers to Boston and New York by this route.

Specie going to Europe.-The Asia, which sailed from New York on the 26th for Liver pool, took out eight hundred and fifty thousand deliars in specie! This goes to pay for goods manufactured in foreign countries. For the week previous to the sailing of the Asia, upof half a million of specie was exported from New York .- | Caledonian,

The Country is preparing for just such a nectady. revulsion as it experienced in 1837-8, and appears to have gathered no sort of wisdom from the bitter experience of those disastrous years. Excessive importations of the products of the pauper labor of Europe, and the consequent drain of specie to pay for them, overspread the 18 h inst, announce the receipt of a letter, by Country with misery and ruin, in 1837, and which he says he will be a candidate for the will do it again. And yet an American Con- Presidency, at the ensning election, if nominalgress, because it is Locofico, will not grant to ed by the National Convention of the Democrat American Labor even the poor protection of it marty. substituting specific for ad-valorem duties!-When shall we have a race American Con- Harrishney, New York and Marshfield, he hav

House of Assembly, is winning golden opinions, in the arduous, responsible and honorable pos he holds. He appears to exhibit rare qualifications for the varied and oftentimes delicate and complicated duties of his position. The Albany correspondent of the Syracuse Daily dull, and gold dust, the chief pabulum of this Journal, in a running sketch of the members of

the House, thus alludes to the Speaker :-The Whigs possess the most talent in the House—perhaps no more than their proportion according to numbers. There are but few of in Cowes roads for the night and will probably brilliant talent, though quite a goodly number come up to Southampton tomorrow, when she possessing more than mediocrity. Speaker will exchange salutes with the town and in RAYMOND is the most talented man in the mediately commence discharging the articles House, and is a perfect favorite with all the intended for transmission to London. We unmembers-Loco as well as Whig. I doubt derstand that she brings a much larger quantwhether the Speaker's chair was ever been ty than was at first expected, there better filled since the organization of the State, wards of 500 exhibitors in all and there are le-than this ression, although this is saying very tween 1,000 and 2,000 packages, extending to much to the praise of Mr. RAYMOND, as he has a total of nearly 1,000 tons of general products had some brilliant predecessors. perament is r ported to have fainted entirely away, near the Bookstore, on hearing a rulgow crechair speak of being able to see something " with the naked eye."

For the Free Press. Harper's New Monthly Magazine.

The April number of this Magazine is a remarkable ood one, as all that we have seen, have been , con taluing, as such miscellanies always should, a grevariety of matter. We do not expect or desire t find in a periodical of any sort, that species of knowl olid and elaborate treatise. The periodical from its very nature, is lugitive literature. It presents the ighter forms of composition which are intended to ease the mind for the moment, and give it relief ter severe study. The most, therefore, that can be lemanded in a literary miscellary is, that good pidg ient and taste appear in the selections, and a grace I, pleasant vein, in the original articles.

These conditions it seems to us, are admirably fu led in Harper's Magazine. It is as solid, as such a riodical eaght to be, imparting information on a eat variety of topics, and characterized throughou y a sound tone and a good taste. The April num ber contains sketches of Irving and Bryant, illu rated by striking portraits of each, which are them selves worth the price called for the number. Indee he engravings, by Lossing, who seems to be retain ed as an embel ishing arrest for the work, are remark able both for the spirit and softness of their execu-

hor. We never saw from wood engravings. from renders wish for a Magazine, that shall conain the choicest morse's of the best polite literatuof England and America, together with a succine nonthly summary of events (to us, by no means, th ast valuable feature in the magazine) drawn up b who stands in a position to know, and pudge ac curately of, what is going on in the world, and a illustrated and embelished by an artist of no ord. nary capacity, let him take Harper's New Monthly
